

Introducing a new addition to our Music Center range, the MC1-BT can now directly connect to your Bluetooth enable product. Featuring the highest quality Bluetooth aptX coding, you will enjoy the Elipson sound quality for your portable device's music.

The Music Center BT houses the best digital technology : DAB/DAB+/RDS FM radio, CD player and USB input (MP3/WMA compliant). A switching amplification solution from Bang&Olufsen ICEpower® was chosen for its sound quality and high power efficiency.

Designed and engineered in France.
Design by Jean-Yves le Porcher.
ICEpower® is an independent subsidiary of Bang & Olufsen.
