■ From SP Records to the latest Smartphones, A Hi-Fi System for 3-generations

● 3-speed Turntable Supports 78RPM SP Records

The LP-P1000 supports not only 33-1/3 and 45 RPM for LP/EP but 78RPM SP records as well. The auto-return tone-arm automatically returns to the resting position when finished. A rubber mat for the turntable is included to absorb vibrations and eliminate track skipping during playback.

● Wireless Music Playback from Smartphones and Tablets via Bluetooth®

The LP-P1000 allows you to playback music files wirelessly from your Smartphones or Tablets via Bluetooth® connection.

● CD Player Supports CD-R/RW Disc and MP3/WMA Playback

A Tray-loading CD Player plays back CD-R/RW discs as well as conventional audio CD, MP3 and WMA files. The LCD display shows song title and artist name. (2-byte characters are not supported on the display.) The LP-P1000 offers versatile playback modes such as program-play (max 32 tracks), shuffle-play and repeat-play.

● 2 Auxiliary Audio Inputs on both the Front and Back

There are 2 auxiliary audio inputs, a stereo mini jack on the front and RCA jack on the back. Connect your TV and enjoy programs and movies with hi-fi quality. (Front AUX1 has priority to AUX2 on back.)

● PLL Synthesized AM/FM Stereo Tuner

The LP-P1000 employs a PLL Synthesized AM/FM Stereo Tuner and stores a total of 40 (AM 20 + FM20) of your favorite stations.

■ Hi-Fi Design in a Retro-modern Look

● High Performance Stereo Amplifier with 25W + 25W Output Power

The LP-P1000 delivers 25 watts + 25 watts output power and fills your living room with comfortable sound from Bluetooth® devices, CD's or your LP's.

● Separate 2-way Speaker Units

The LP-P1000 incorporates a pair of separate speaker units that accept as much as 25 watts of output power from the main unit. Thanks to the separate speaker, the device offers stable operation and allows you to push the speakers to their full potential without the worry of skipping your records. To help emphasize the warm bass tones and reduce vibrations, TEAC made sure to include sufficient bass reflex holes on the backs of the speaker cabinets. The speaker cabinets comes in a matching wood-grain finish, walnut or black

● A 70s Retro-modern Design a Reminder of Old Modular Stereos

The design idea of the LP-P1000 is borrowed from old Modular Stereo Sets, prevalent in the 1970s. Its appearance reminds users of the good-old-days. Its retro-modern appearance pairs well with contemporary interior furniture, as well.

● BASS/TREBLE Tone Control and L/R Balance Control

The LP-P1000 employs BASS/TREBLE tone control as well as LEFT/RIGHT balance control that allows users to adjust the sound.

● Headphone Output

A Headphone jack is located on the front panel, perfect for listening to music late at night.

Supplemental to New Product Information (SNPI)

TEAC

- **Bright and Easy-to-read LC-Display**

For better visibility, the display employs a bright LC-Display with digital clock. You are able to change its brightness if necessary with the dimmer.

The LP-P1000 also employs an On/Off Timer allowing users to select the playback source of your choice (CD/AM/FM/Buzzer) volume level for wake up, and max 90 minutes sleep timer.

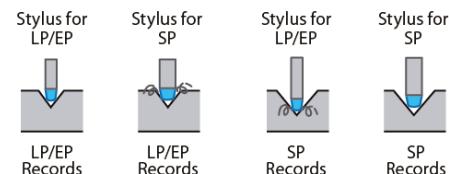

- **AUX Audio Output allows the LP-P1000 to be used as an external turntable unit**

Thanks to an auxiliary audio output, you can use the LP-P1000 as an external turntable unit by connecting it to an existing amplifier. The LP-P1000 will also send an audio signal from the CD player, Bluetooth® devices, or AM/FM tuner.

- **Replacement Stylus Available for SP Records (Sold Separately)**

In order to prevent unnecessary attrition, or maintain accurate tracking on SP records, TEAC provides a replacement stylus tailored to the differing groove widths for SP records.

Features at-a-glance

- Wireless connection from Smartphones, Tablets and Laptops via Bluetooth®
- 3-speed Turntable including 33-1/3, 45 and 78 RPM allows SP record playback as well as from LP/EP's
