ILINE COLUMN ARRAY

Complete iLINE COLUMN ARRAY set

“Column Array” column systems

Aesthetically pleasing, the system comes with 2 families of columns. One for installation with columns iLINE23, iLINE43, iLINE83, and the other for stage performance with the iLINE83B model.

They are linked and powered by an active subwoofer, the iLINEsub12A which embeds a double amplification of 700W/5 Ohms in class D for the columns and 700W/4 Ohms for the lower part because we can also add the iLINEsub12A as a reinforcement, which is the passive version of the subwoofer.

Go to dedicated website :
iline-series.audiophony.com

Modulate your desires.

Whether for mobile or fixed use, the system answers all your problems.

The system offers multiple possible combinations, for example, 2 columns, 1 subwoofer or 2 subwoofers, 2 columns, etc.

Once controlled by an active subwoofer, the iLINEsub12P passive subwoofers can supply the satellites for numerous configurations.

A system that travels well.

Lightweight and robust, the subwoofers are made of a very resistant wood, Finnish birch multi-ply plywood with a protective polyurethane resin coating, which is very resistant to scratches.

You can transport your entire iLINE system anywhere.

Touch the power, that's all!

If you want to touch the system's sound settings, an "iLINEbox" USB to RJ45 converter is sold separately. This box is needed if you want to adjust the built-in DSP.

The native DSP is preset to factory settings in order to ensure optimal system behaviour.

Only compatible with Windows

Available in black or white finish for service or installation.

Ergonomic and smart.

We reserved storage compartments in the back of the subwoofer for the two satellites, ensuring you a safe and very handy transport.

MojoControl.

The MojoControl app for Apple iPad allows you to take control of the system's mixer.

You can set and customize each channel, adjust the curve with the parametric equalizer, choose the type of effect and record scenes.

THE MOJO RANGE

An incredible sound.

The 6 loudspeakers 3" and the 1" motor of the column allow a dispersion of 120° horizontally and 30° vertically.

This asymmetrical diffusion avoids reflection phenomena and therefore optimizes rendering even in difficult configurations

Easy to use

Lightweight and robust, subwoofer is made of high-strength wood, plywood Finnish birch with a protective polyurea resin coating that is highly resistant to scratches. You can transport your entire MOJO1200Line system anywhere.

The columns are easy to assemble and disassemble thanks to their stacking system. In addition, to simplify your life, all the amplification is integrated into the MOJO1200Line housing and the connection of the amplification module is clear and precise.

A setup for each configuration

The MOJO1200Line offers the possibility to adjust your sound to your desires. You can choose between 3 factory presets and 5 user presets. They are easy to set up and use.

Feel the power with TWS Bluetooth®.

Discover the “True Wireless Stereo” technology. Send music from your mobile to the MOJO1200Line.

Thanks to the “True Wireless Stereo” technology, it will transmit the Bluetooth audio signal to a second MOJO and you will enjoy the Stereo mode!

The Bluetooth® signal is transmitted from the master MOJO to the slave MOJO to enjoy stereo sound.

Comes with bags!

Protect your MOJO1200Line with Audiophony covers. They are made of high quality nylon and include carrying handles and a zipper system.

MOJ0500LIBERTY

500W compact active audio system for all types of applications.

The MOJ0500LIBERTY is an evolution of the already famous MOJ0500LINE.

It retains the same power, the same diffusion technology, the same protections and the same dimensions.

One of the evolutions is found in a brand new ultra-complete mixing desk with reverb, Bluetooth® and all available connector formats. But the major evolution is the contribution of a Panasonic battery allowing an operating autonomy ranging from 5 to 15 hours depending on use.

Very complete 6-channel mixer with 2 microphone inputs, 3 line inputs, 1 Auxiliary and 1 Bluetooth®. Reverb effect adjustable on the microphone and instrument channels.

ATOM ACTIVE SPEAKERS

Go to dedicated website :
atom.audiophony.com

The ATOM series is equipped with a simple DSP and is easy to use. It allows you to adjust and configure your speaker to the required use with the touch of a button. The internal processor's different presets adapt your speaker to the current use (front, backstage, etc.) but also the current sound application (DJ, Live, Speech, etc.) without forgetting the ability to correct bass and treble +/- 10dB in order to compensate for a room's acoustic problems, for example.

Each ATOM speaker offers two inputs and one output, a large choice of connectivity in order to connect all kinds of sources at Micro or Line level.

The design of this new series provides usage flexibility and exceptional installation thanks to M10 attachment points, backstage position and an ingenious 35mm double position base allowing the speaker to be used on a stand in a straight or inclined position of 7.5° downwards.

SÉRIE SR

Robustesse, Puissance, Excellence

Resistant, Powerful, Outstanding

2-way passive or active speakers

Outstanding

No matter how hard you push it, the SR series will provide a balanced, dynamic output. These very powerful speakers have an outstanding sound quality, without any distortion even at full power.

Powerful

The incredible SR speakers sound output comes from a D and AB bi-amplification up to 400W RMS, with an outstanding 124 dB SPL.

Resistant

The SR speakers were designed and built for intensive live performances. They are light, robust, and very handy. The 7.5mm HPP housing guarantee an unrivaled solidity.

The SR Series settings meet two specific criteria: simplicity and efficiency. You can access the volume, equalization or operating controls from the dedicated rear panel.

SR ACTIVE SPEAKERS

The SR series speakers have been designed for multi-purpose and intensive use. The four Presets offer effective protection and settings for all kinds of uses whether at the front, backstage, DJ set or Live.

The perfect music of silence

When silence is a very important factor, you can rely on the Ti series which works as silently as possible.

That makes them perfect for studio, permanent installations and theatres.

These Class D amplifiers feature SMPS units and offer a perfect sound reproduction despite their ultra-compact size.

With every connection you need, they're perfectly adapted for any sound system, studio, and even HiFi applications.

They also feature thermal and electronic protections, so you can operate them safely and with great serenity.

SOUND PROCESSING

**DANTE™ is the NEW STANDARD for “Audio over IP” !
Light jockey’s call it “Art-Net for audio” !**

DANTE™ advantages:

- Uncompressed multi-channel audio over standard Ethernet networks.
- No bulky snake cables !
- No more buzzing due to ground loops !
- Cheap CAT5E-cabling + standard Ethernet switches
- Plug & Play : auto discovery, no IP-addresses, no network knowledge required!
- Easy routing of audio signals ! (Free Dante™ Controller software)
- Extremely low latency: ← 1 ms
- Virtual Sound Card: turns any Windows PC / MAC into a Dante™ audio device.
- Up to 512 audio channels per GIGABIT network!
- Automatic discovery of all Dante™ devices on the network
- 1 Universal protocol: no compatibility problems !

DANTE™ requirements:

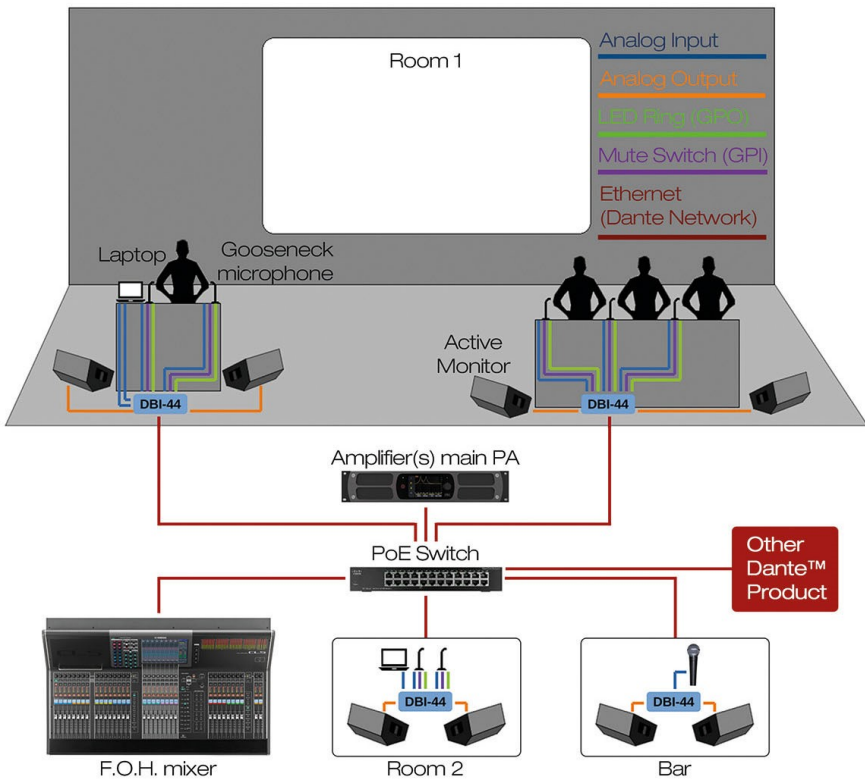

Currently not all audio equipment can talk Dante™ language. The new Synq Dante™ I/O interfaces translate analog audio to and from Network Audio (Dante™).

Analog → Dante™:

- Connect your MIC to the Dante™ network
- Connect your Guitar, audio player, etc. to the Dante™ network

Dante™ → Analog:

- Connect the Dante™ network to your analog amplifier/active speaker
- Connect the Dante™ network to Recorder with analog input

Multi-room install example using PoE

Room 1:

- Easy cabling :
1 single Cat5e network cable transports all audio signals in both directions. This makes it very easy to expand and modify the existing system.
- A single GPI trigger (here a potentiometer on the desk which is plugged into the DBI-44) sends a signal to the GPIO connected devices (the gooseneck microphones and a LED light) to turn them on and off. GPIO can also be used to trigger or communicate with anything else on the network.
- Record and play audio from and to any room on the Dante™ network.

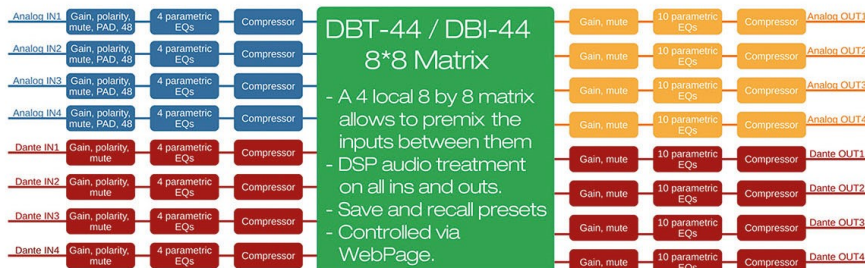

Room 2:

- No need for a separate mixer:
Mix all sources (2 microphones, one audio input from a computer, the audio from the main room) using the DBI-44 its integrated web browser and add EQ, compression, etc.
- If you need extra audio inputs just add an extra DBI-44 box. Thanks to the DBI-44 its integrated 8x8 matrix you can easily mix up to 8 separate inputs.
- GPIO allows you to control the gain of each microphone locally. Just connect a potentiometer to one of the GPI inputs.

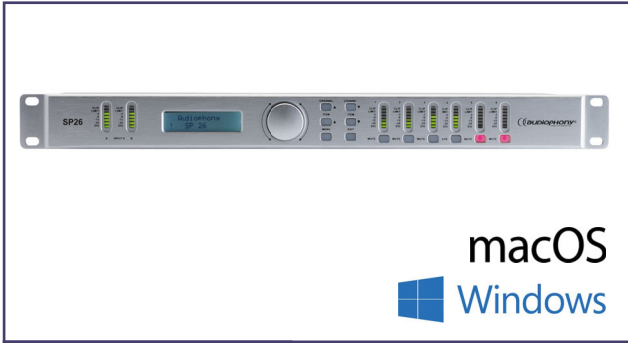

Bar:

- The DBI-44 box allows the playback of background music originating from any sound source in the Dante™ network.
- The DBI-44 box also allows to connect an extra microphone for announcements
